

NICHOLAS NAUTH

antonnnauth@gmail.com | 647-571-3203 | [Portfolio](#) | [LinkedIn](#) | [Github](#)

Software developer with a degree in Computer Science and hands-on experience building mobile and web applications using Kotlin, React Native, and the MERN stack. Comfortable working on both the front and back end, with projects that include a custom search engine and a full-stack blog. Strong teamwork and communication skills from past customer service roles. Looking to join a team where I can build useful, user-friendly software and keep growing as a developer.

SKILLS

Languages: Kotlin, Swift, Java, Python, C#, JavaScript

Frameworks & Libraries: React Native, MERN Stack, Android SDK, Jetpack Compose, UIKit

Mobile Development: Android, iOS

Databases: MongoDB, SQLite, Firebase

APIs & Data Formats: RESTful APIs, JSON

Version Control: Git, GitHub

Tools & Environments: Android Studio, Xcode, Firebase

UI/UX Design: Material Design, Human Interface Guidelines

Testing: JUnit, Espresso, XCTest

RECENT EXPERIENCE

Data Integration Engineer - Outlier AI - Nov 2025 - Present

Technologies: MongoDB, Express.js, React, Node.js

- Integrated and set up complex client data sources, ensuring reliable, high-volume data flow to the core anomaly detection engine.
- Refined data quality by deploying proprietary validation and transformation logic, meeting stringent standards for ML model consumption.
- Drove strategic content labeling and taxonomy creation, directly enhancing feature relevance and predictive precision.
- Partnered with ML/Product teams to troubleshoot errors, sustaining system reliability and accelerating business insight delivery.

Customer Service Representative - Attain Finance - Toronto, ON - Oct 2024 - Oct 2025

- Provided technical support for financial services via multiple channels, specializing in troubleshooting complex account, application, and technical issues for rapid client resolution.
- Achieved 100% quality score on performance monitoring, leveraging strong communication, process improvement collaboration, and effective use of CRM tools to ensure service excellence.

Coding Instructor - Student Scholars - Toronto, ON - Apr 2022 - Aug 2024

- Developed and led a 10-month curriculum teaching students of all ages coding fundamentals, data structures, and UX, using Scratch and Python.
- Guided students in building and programming LEGO SPIKE Prime robots and creating their own games from start to finish with full independence.

EDUCATION | Trent University Bachelor of Science in Computer Science | 2023 Peterborough
